

NAME OF PRODUCT

CNC PROFESSIONAL SERVICES

By using the traditional techniques of carpentry and computer-controlled woodworking machines in the **CNC system**, we are able to perform complex work in wood, wood-based materials and plastics.

Work on **CNC machines** allows to perform large series of elements while maintaining precision and repeatability of the best quality.

Modern machinery and qualified staff are the key elements that affect customer satisfaction and the ability to implement our diverse and the most complicated orders. For milling we use the highest quality tools, so that we get accurate and high quality products.
