

PRODUCT NAME

CHANGING ROOMS SYSTEM GLASS 10

USED IN

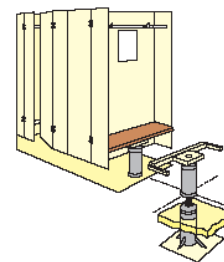

- sports and recreational facilities (swimming pools, indoor swimming pools, fitness clubs, spa, sports halls and entertainment)
- shopping centers

PRODUCT ADVANTAGES

- unusual strength due to solid construction
- the high quality of the material used
- resistant material to scratches and chemicals
- perfect combination of durability, aesthetics and functionality
- easy to clean and keep clean
- safety of use by suitable construction
- design based on the modules
- ease of installation

System GLASS 10 is available for all types of cabins: individual, family and special, free-standing or attached permanently, one or two doors. Cabs can be equipped with any known locking system.

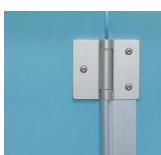

Each individual cabin stands on the central leg. The basic step is fixing feet in the concrete floor. Then the floor is finished. The next step is to mount the cab. The upper part of the mount cylindrical rod, to which are attached cabin walls provide good stability.
