DESCRIPTION

Above-average requirements for materials used where there is water, make it necessary to use materials of extraordinary quality.

Our system wardrobes based on the use of high-pressure laminated HPL. The use of such plates in combination with excellent technique creates a reliable solution and for long-term durability.

Base frame made of closed profiles quadrangular cross section. Feet bases equipped with height adjusters, which allows for leveling wardrobes even in rooms an uneven floor. Seat create a strip made of laminated HPL.

The technique for cabinet configurations PBM SYSTEM proposed such a solution that will provide many years of reliable operation and durability appearance.

Wardrobes are made in sets. You can make the wardrobes by the customer, adapting to the requirements of the premises.
